Greetings From Burujtech solutions;

Dear Mr Anugboba,

I am pleased to introduce myself and my firm, Burujtech Solution. We are excited to get to work on your new mobile app, and we want to make sure you are satisfied with our proposal/quotation and have a full understanding of what to expect in this lengthy process. Creating a mobile app is exciting, and our expert team is fully capable of giving you something unique that will surpass your expectation.

The following proposal will set a project road map from start to finish. You will have a complete understanding of the process and timeline for completion. And if you have any questions or concerns, please contact me personally.

We develop apps so you don't have to

We are living in the age of connectivity, and that means more things than ever before are right at your fingertips — literally. With one press of the button, one swipe left or right, you can open up new worlds in seconds. We're talking about apps, those little icons on your mobile device.

But at Burujtech, we don't just talk about apps; we design, develop and make apps awesome. We have assembled a team of the best and brightest minds in software development, marketing, and leadership, giving our clients access to the most cutting-edge technology. You can rest assured you're in good hands, as we have years of experience in Android mobile development and web app development.

Our goal is to create something you're proud of and that will blow your mind. Apps can be transcendent, and they can also be colossal failures. That's why Burujtech has developed a comprehensive approach to app development that takes the guessing out of the game. We're ecstatic that you're considering doing business with us, so let's get started.

What to Expect

Mobile app development is serious business. It takes time and patience to create something that works for you and is free of bugs and other issues. Updates are required, but it's important to start with a sound foundation. At Burujtech, we believe in a thorough approach that provides our clients with as much engagement as they request. While our entire team will be developing your app, we will assign a project lead (I personally) who will be your main point of contact.

Research and outreach

A large part of the work Burujtech does is behind the scenes. There will be times when we don't communicate with you for weeks, but that's only because we're intimately involved in the development phase. However, before any of that begins, we need to make a checklist of everything you want in your new mobile app.

We will gather information about your service and how it works. We will figure out who your customers are and how we can attract more through your new app. Audience engagement, research, and branding are key in app development, and we will conduct focus groups to find out why people need this app.

Framework

Like a website, an app needs a sitemap and wireframes. Think of this as the structural integrity of a skyscraper. Burujtech will have an important role in the design process, as it's important that you are getting what you want. Plus, it's better to work out issues in this stage than later down the road. Here are some highlights of this process:

- Functionality and content
- Wireframes, the structural core of your app
- Branding and integration of existing digital platforms (i.e., web and email)
- User Experience and User Interface, or UX and UI — essentially, how you interact with the app, what makes it easy to use and desirable

Development

We've come a long way at this point. You've put in a lot of work, so now you can step aside and let us do the rest. This part of the process is laborious and time-consuming, so don't expect to hear from us much. But that's a good thing, as we've worked out all the kinks and come to an understanding about everything that will go into your new app. Once development is complete, Burujtech will be back in the fold for the testing trials.

Testing and launch

We're almost there. Your new mobile app is built and ready to launch. But before that happens, Burujtech and your service need to collaborate on a marketing strategy. After all, just because you invested all this time and money into your new app, it doesn't mean anyone will know it exists unless we tell them.

Timeline

Burujtech estimates that it will take one to two months to complete your new mobile app. Upon signing this agreement, we can begin immediately.

Features/Functionalities of the App

The followings are the features/functionalities of the app. More features to be added in the future as necessities unfold.

- Material Design
- Email Registration & Login
- Verification, Forgot Password & Resend Email
- Advance Push Notification
- Cart Page
- Navigation Drawer Menu
- Share, Rate & App Info
- Firebase Google Analytics Integration
- Ripple Effect
- APIs
- Displaying of farmers' produce

- General chat handler
- Direct chatting
- Sending and Receiving of files
- Uploading of Images
- Farmers and Agents Database
- Admin dashboard
- Gateway payment integration
- Agro ecommerce
- Location based services
- Free membership (limited information)
- Paid membership

Expenses

This budget breakdown is based on the project outline described above and other requirements not stated. Please contact your project lead with any issues or questions before signing.

Project	Cost(N)	subtotal(N)
Planning, Research/Outreach, Discovery and Wire framing	N30000	N30000
App Screen Designs(UI and UX)	N70000	N70000
Android native development	N50000	N50000
Back-end Programing, Database and APIs	N100000	N100000
Quality Assurance and Refinements Android	N25000	N25000
Deployment and Cloud	N25000	N25000
Total	N300,000	N300,000

One-third of the budget is due upon signing this agreement. The remaining balance must be paid within 30 days of the launch of the app.
